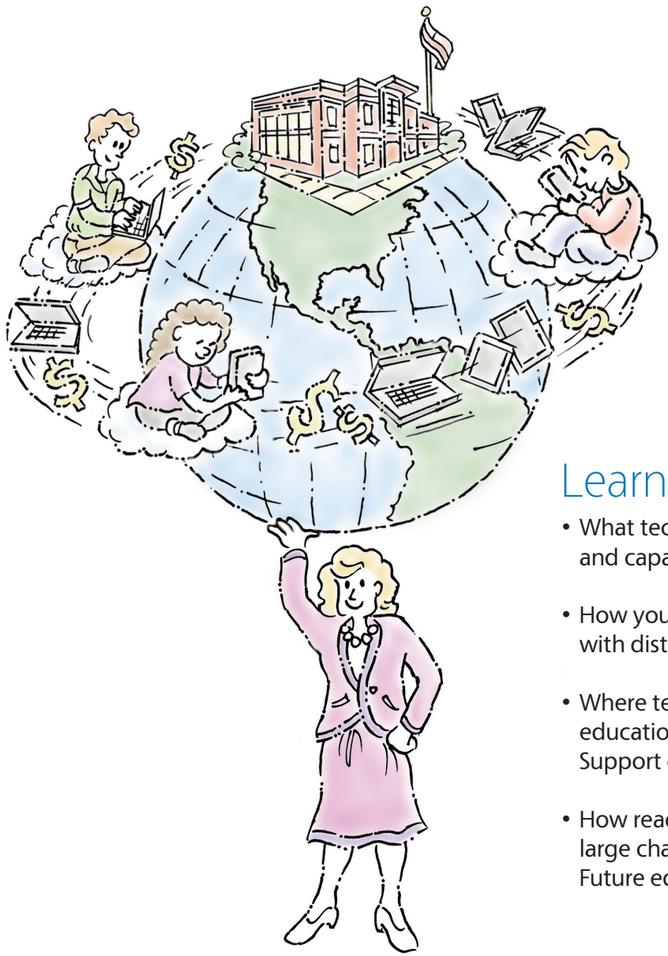
For superintendents new to the district:

Questeq's Educational Technology Assessment

You assess teachers and students.
Let us help you assess your technology.



Learn:

- What technology team roles, competency and capacity you have?
- How your technology costs compare with districts of similar size?
- Where technology could better impact education: E-rate funding and grants? Support of curriculum? Data reporting?
- How ready is your technology to manage large change such as 1:1? Flipped classrooms? Future educational technology changes?

Goals of an Educational Technology Assessment

An Educational Technology Management Assessment is done to determine whether a district has the technology potential to impact student engagement and outcomes.

Executive Summary.

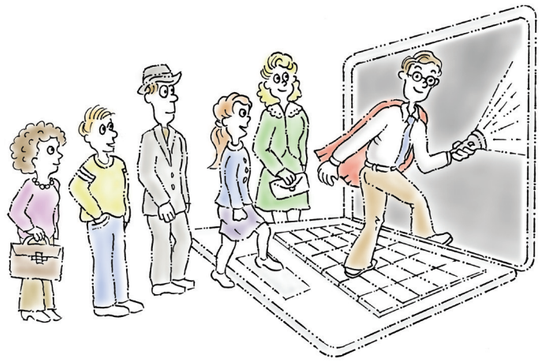
Each Assessment has a very concise executive summary for the district's new leadership.

Who Do We Have?

- Technology department structure
- Competency of each position
- Roles and responsibilities
- Job descriptions
- Capacity and performance

What Are My Deficiencies?

- Instructional technology
- Administrative technology
- Assets—refresh cycle, age, types
- Budget and spending
- Strategy and vision
- Support and communication

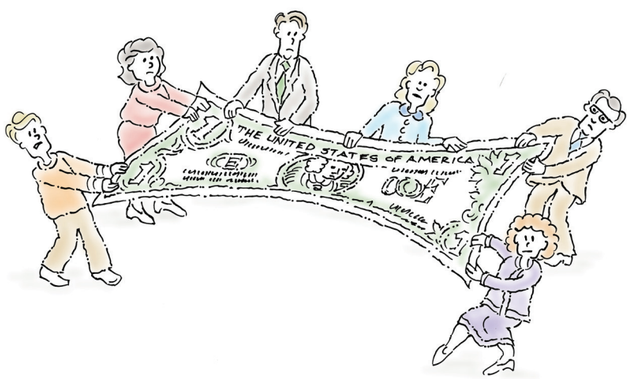


Where Could Technology Better Impact Education?

- Have we leveraged E-rate funding and grants properly?
- What is the strength of technology for support of curriculum, administrative functions, data/PIMS reporting, and more?
- How do our stakeholders view the value our technology brings?

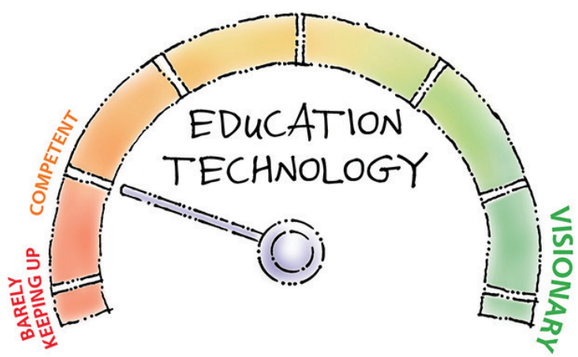
What Are Our Costs?

- Overall technology staff cost
- Market value of each position
- Cost of benefits and retirement
- Yearly inflation projections
- Third party vendors role and cost
- Overall technology budget



When Will Our Technology Be Ready For Change?

- 1:1 initiatives or BYOD
- Cloud migrations
- Boardroom automation
- Library transformation
- Flipped classroom
- Future educational technology changes



With more than 30 years of K-12 experience Questeq helps over 100,000 students and teachers daily to utilize the latest technology.
